

Customer Success Story

Plastics Manufacture

Company Overview:

As pioneers in breathable film development, our client continues to advance multiple types of film technologies to meet the growing demand for film performance across a variety of markets and applications

Challenges

- Originally lubrication maintenance done manually
- Client seeking improved lubrication strategy to reduce costs
- Contamination issues leading to downtime
- Culture shift and multiple locations to engage for buy-in

Solutions / Products

- Automated central pump lubrication systems placed on all machines
- Introduced filtration and breathers to reduce contamination
- Implement single point lubricators to further reduce manual lubrication needs

Benefits

- Cost savings
- Improved up-time
- Implemented across plants
- Company cultural embraced precision lubrication approach
