

Our customer is one of the world's leading providers of aerospace systems and services for large commercial aircraft. With a focus on improved passenger safety and comfort, maximized operational efficiency and improved availability, maintainability and sustainability.

## Challenges

- Safety issues from spilled oil
- Tramp oil in coolant created additional maintenance duties and excessive costs
- Empty reservoir alarms on oil systems forced shut-down of critical milling machines
- Oil reservoirs were being refilled daily to meet production demands.

## Solutions / Products

- Successful demonstration of fluid-grease lubrication system
- Complete replacement of oil lubrication systems with LHL grease systems
- Regular inspections by LubriSource techs to ensure proper lube cycles, and properly functioning equipment

## Benefits

- Machines runs longer without interruption
- Coolant is easily recycled providing significant cost savings
- No oil spills
- Regular intervals insured minimal lubrication equipment replacement
