

Customer Success Specialty Chemical Manufacture

Company Overview

Our client is a global specialty chemical company with a full range of complex inorganic color pigments for the premium coatings and plastics markets.

Challenges

- Bearing loss due to manual lubrication in very challenging locations
- Client was unfamiliar with ALS but eager to innovate
- Specific machinery needing lubrication systems was 3 stories high

Solutions / Products

- LubriSource designed a series progressive Graco lube system with a G3 pump
- LubriSource installed system and provided training to client on the operation.
- Implemented single point lubricator (Pulsarlube) on specific gears

Benefits

- Reduced bearing failure
- Decreased costs
- Client culture embracing automated lubrication systems.
